

## TECHNICAL BULLETIN No 2025003

### **DetectaHead® Potential issue when used with other poles**

The DetectaHead® is primarily designed for use with the DetectaPole® but will fit other manufacturers access poles.

Other manufacturers poles may not have slow-release features but rather spring/button releases designed to be used in tent poles and parasols which when pressed with a head and can fitted can cause the pole to collapse rapidly.

If the DetectaHead® is attached to another manufacturers pole and caused to drop rapidly it can cause a shock to the DetectaHead® resulting in damage around the bracket attachment area.

Ideally, the DetectaHead should only be used with the DetectaPole®. It is recommended for operator safety and protection of equipment that the DetectaHead® is used with the DetectaPole®.

If the DetectaHead® is used with another pole it must be lowered in a controlled way NOT allowed to drop from height.
